

Major System Failure

All utility interruptions (gas, water, or electric) should be reported to facilities at 713.545.8543. If no answer or after hours, call security at 281.448.4900.

If necessary, the director of real estate operations will inform the president or a vice president concerning the nature of the emergency and the anticipated time of restoration of service, if known.

Under some circumstances, power interruptions may be anticipated. During the summer months when demand for electricity is high, the College may experience a planned interruption or rolling blackouts as required by the local utility company. Normally, the College will have advanced warning when this occurs.

If it becomes necessary to reduce energy consumption, the following will be instituted:

- Shut off all lights and equipment not essential for safe operations. Power down all equipment after each use and only turn on that which is needed to complete work. The cooling plant will be taken offline; but staff will endeavor to maintain fan operation to provide ventilation in the buildings.

- Shut off all lighting (except for emergency lighting) and extinguish any open flames. Take measures to protect equipment. Voltage may fluctuate. Remember, air operated controls and domestic water pressure may be affected. The elevator may be taken out of service.
 - ◁ Set all switches to "OFF" position.
 - ◁ Report persons trapped in elevator to facilities.
 - ◁ If you are located in an area where there is no emergency lighting or it fails to come on, please move to a corridor located on an outside wall where there may be natural light from the windows. Wait in this area until you are given further instructions.
 - ◁ If you must evacuate your area, safeguard your valuables and lock your desk.
 - ◁ It is advisable to keep a small personal flashlight available to assist you in the remote chance of a blackout at night.
